- 2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.

2000 Analytical Review DWCCA-6818-PJL

Dear Mrs. Storandt:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

- 1. During our review, we noted that the utility did not report any depreciation expense on meters charged to sewer, (Account 110) or local and school tax equivalent on meters charged to sewer department, (Account 408). If the sewer department uses the water meter to measure sewer volume, all the water meter costs must be shared, including depreciation, return on rate base and taxes. Please review Section 4, Pages 10 and 11 of the Water Utility Reference Manual (enclosed) and properly allocate all water meter costs for 2001.
- 2. During our review, we noted that there were no dollars reported retired for Account 346 on page W-8 for the meters reported as retired in column (d) of the Meters schedule on page W-17. Please confirm that Account 346 will be adjusted in the 2001 report or otherwise explain the reason there were no retirements reported on page W-8.
- 3. As directed in the head notes of the Water Operation & Maintenance Expenses schedule on page W-5, please provide an explanation of any expense account which changed by \$2,000 and 30 percent when compared to the previous year and follow this procedure in the future.
- 4. During our review, we noted 175 services in use reported in the Water Services schedule and 206 customers reported on page W-2. Please confirm that there are a significant number of services with multiple customers per service.
- 5. Please confirm that the 7,144 reported in column (c) of line 6 on page W-2 should actually be reported on line 9.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 30

Response received 9/17/01:

Dear Mr. Leege:

I am writing in response to the questions on the 2000 Analytical Review for Wyocena Water & Sewer Utility. The report had a number of DWCCA-6818-PJI for your reference.

- 1. This will be changed for in the year 2001. The client changed the way they measure sewer usage and the water and sewer departments will share the meter costs. The utility use to charge a flat rate and there was not a need to share the costs.
- 2. There was a change in personnel and this was probably a more accurate counting of meters. We used retirements for the decrease to get the meters to the number they should have been and showed no cost reduction because there was none.
- 3. Three accounts should have been explained by your \$2,000 and 30% guidelines. The accounts were 620, 630 and 650. Account 610 was reviewed and all items recorded appeared reasonable, the account was just done from the year before. Accounts 640 and 650 added together were the close to last years total, the difference is in the classification of the two accounts.
- 4. The difference in the number of services and the number of customers are a few services have multiple customers and the client also has standby customers that are included in the number of customers.

On page W-2 the 7,144 should go on line 9 instead of 6, I apologize for the incorrect line.

WATER OPERATING SECTION FOOTNOTES

Water Operating Revenues - Sales of Water (Page W-02)

Per request from JPL on 4/24, moved the 7,144 figure in column (c) from line 6 to line 9. Change was confirmed by utility in review letter. PJL

Water Operation & Maintenance Expenses (Page W-05)

Per review response:

Three accounts should have been explained by your \$2,000 and 30% guidelines. The accounts were 620, 630 and 650. Account 610 was reviewed and all items recorded appeared reasonable, the account was just done from the year before. Accounts 640 and 650 added together were the close to last years total, the difference is in the classification of the two accounts.

Meters (Page W-17)

THE WATER AND SEWER UTILITY HAD A CHANGE IN PERSONNEL IN 2000, AND METERS HAD AN ADJUSTMENT TO METERS THE SIZE OF .625 FOR ACTUAL INVENTORY AT THE END OF 2000.

THE AMOUNTS SHOWN IN THE RETIRED COLUMN REPRESENT ITEMS THAT WERE JUNKED DURING THE YEAR.
